

Development of a Commercial Process for the Production of Silicon Carbide Fibrils

Project Lead

ReMaxCo Technologies,
Inc.
Knoxville, TN

Description

The purpose of this project is to develop a commercial process for the production of silicon carbide fibrils, as a material for high-temperature heat exchanger and recuperation components in advanced coal combustion plants. This work is an effort to bring new technology solutions to the future volume production of silicon carbide fibrils.

Duration: 10/2/96 - 9/30/01

Product Support Areas

Gasification Technologies	Combustion Technologies	Sequestration	Environmental & Water Resources	Advanced Turbine & Engines	Fuel Cells
					

Project: FEAA09
Code: REMAXCO-4
